

Berry Metal increases BOF tip life for North American mill by 185% per lance campaign .

Improved yields, increased productivity, reduced costs.

Berry Metal Company (BMC) has announced that, as part of an ongoing trial, the company was successful in dramatically increasing lance tip life for a major mid-western BOF mill. The increased longevity of the tips averaged 185% per lance campaign, making the BOF operations of the customer more efficient and productive.

The improved heat life, reduced maintenance and decreased downtime resulted in increased yields and cost savings.

"We are extremely pleased with the enhanced performance and productivity we were able to deliver for our customer," state David Werner, President & Chief Operating Officer. "Working hand in hand with the customer we were able to improve their operations and performance."

About Berry Metal Company: BMC is more than a technology supplier... Since 1951, BMC has provided proven dependable manufacturing with continuous product innovation and improvement. We are an engineering company with unparalleled manufacturing capabilities. We provide dependable and ground-breaking furnace solutions for steelmakers. And we create long-term relationships by supporting those solutions through a "boots on-the-ground" approach because we are invested in our clients and their continued success.
